Flint Hills Resources Alaska Selects ISNetwork for Contractor Management
ISN expands Refining Client Base

DALLAS (August 26, 2011) — ISN is pleased to announce that Flint Hills Resources (FHR) Alaska has chosen ISNetwork to enhance its contractor management processes. FHR Alaska will utilize ISNetwork to collect and verify contractor health and safety information to assist in selecting qualified companies to perform services at the FHR Alaska facilities.

FHR Alaska joins other Koch Industries, Inc. companies that utilize ISNetwork and is the 10th Flint Hills Resources facility to implement ISNetwork.

FHR Alaska owns and operates the North Pole refinery and products terminals in Fairbanks and Anchorage, Alaska. The North Pole refinery has the processing capacity of about 220,000 barrels of crude oil per day and supplies gasoline, jet fuel, heating oil, diesel, gasoil and asphalt to Alaska markets.

“ISNetwork is an important element in standardizing our contractor management process,” said Jerry Fillingim, FHR Alaska Contractor Safety Coordinator. “We see benefits for all parties involved and anticipate a smooth transition as we uphold our continued goal of safety and quality.”

“It is a great opportunity to work with an additional FHR facility. The ISN team will assist FHR Alaska with its contractor management goals and ensure contractor compliance for its refinery and terminals,” said Adam Logan, ISN Downstream Team Lead. “We look forward to assisting FHR Alaska throughout the implementation of ISNetwork.”

About ISN

ISN provides an online contractor management database, ISNetwork, which is designed to meet internal and governmental record keeping and compliance requirements. ISN collects health and safety, procurement, quality and regulatory information for more than 34,000 contractors and over 215 Owner Clients. Through its Review and Verification Services (RAVS), ISN's subject matter experts review and verify contractors' self-reported information, incorporating a level of due diligence to the process. Contractors also use the system to manage internal training and recording keeping requirements. For more information, visit www.isn.com.
