Valero Pembroke Refinery Selects ISNetwork for Contractor Management *ISN Expands International Client Base*

LONDON, United Kingdom (26 September 2011) — ISN is pleased to announce Valero's Pembroke Refinery has selected ISNetwork as its key tool for contractor management. With the addition of the Pembroke Refinery, the 13th Valero Refinery to implement ISNetwork, Valero joins the growing list of companies that utilise ISNetwork in the United Kingdom.

Valero Energy Corporation is a Fortune 500 company based in San Antonio, Texas. Earlier this year, Valero acquired the Pembroke Refinery in Wales, U.K., marking Valero's entry in the European refining market. The Valero Pembroke Refinery has a total throughput capacity of 270,000 barrels per day, of which 220,000 barrels per day is crude capacity, and is one of Western Europe's largest and most complex refineries.

"We have enjoyed working with Valero in the United States over the last six years and look forward to expanding our relationship into the United Kingdom," said Brittany Boynton, Manager, ISNetwork UK. "We value the support received thus far from Valero's employees and contractors at the Pembroke Refinery and look forward to a successful implementation."

About ISN

ISN provides an online contractor management database, ISNetwork, which is designed to meet internal and governmental record keeping and compliance requirements. ISN collects health and safety, procurement, quality and regulatory information for more than 35,000 contractors and 220 Owner Clients. Through its Review and Verification Services (RAVS), ISN's subject matter experts review and verify contractors' self-reported information, incorporating a level of due diligence to the process. Contractors also use the system to manage internal training and recording keeping requirements. For more information, visit www.isnetwork.co.uk.
