

August 18, 2008

To whom it may concern:

Combo Energy Services Inc. subscribed to ISNetworld in February 2008. We subscribed to ISNetworld before receiving an Owner Client requirement; we simply recognized the benefits ISNetworld provides and took advantage of the opportunity to subscribe. After proactively establishing our subscription, we have acquired vendor connections with three Canadian Owner Clients. We completed our health and safety questionnaire quickly, and our Owner Clients could immediately see our company's health and safety information. This has increased our efficiency and administrative organization, and decreased time spent on duplicative pre-qualification packets.

The ISNetworld system has proved to be convenient, simple to use and valuable. The ISNetworld RAVS process challenged us to review and scrutinize our previous safety program, which enabled the development of a comprehensive safety program covering all employer/employee needs and regulatory requirements. We are now extremely proud of our safety record and the material and trainings our employees implement.

The ISNetworld Team has always been knowledgeable and helpful. We can depend on the Customer Service Team to help us meet our Owner Client requirements with prompt and informative service. I would like to thank the ISNetworld Customer Service team for their dedication and willingness to assist our needs, consider our suggestions, and address our concerns.

ISNetworld has increased Combo Energy's standard of excellence. I am a believer that contractors and Owner Clients will find many unexpected benefits with ISNetworld, and will gain much appreciation for the ISNetworld Team and system.

Regards,
