To Whom It May Concern:

Katch Kan Limited engineers systems that eliminate on-site fluid contamination which optimize rig performance, personal safety, and sustainable development within the upstream oil and gas industry. Katch Kan Limited makes it a top priority to consistently over achieve our COR safety and quality assurance standards. ISNetworld plays an important role in this process by providing one central location to submit our health and safety information including our WCB Clearance Letter, WCB Rate Sheet, COR, insurance, and safety programs.

My experience with the ISNetworld Customer Service team has always been positive. They are very detail-oriented and organized. The consistency and follow-up that the customer service team provides is outstanding. Any time I have a question or concern, they work with me to clarify my Owner Clients requirements and continue to follow-up until the situation is rectified. They make submitting my information to my Owner Clients easy and painless.

In addition to excellent customer service, the ISNetworld database is fast and user-friendly. I have no hesitation in recommending ISNetworld as a contractor management system.

Sincerely,

Erwin Hungsberg

Katch Kan Limited
