To Whom It May Concern:

Newsco Directional & Horizontal Drilling Services Inc. is a directional drilling company whose goal is to provide products and services which meet or exceed standard industry expectations. We strive to achieve the Owner Client's expectations while maintaining a safe working environment for all.

Newsco Directional & Horizontal Drilling Services Inc. subscribed to ISNetwork in April 2009. We completed our health and safety questionnaire quickly, in order to facilitate immediate exposure to our company's health and safety information.

The ISNetwork system has proved to be convenient, simple to use and valuable. The ISNetwork RAVS process allowed us to further enhance, and improve on our previous RIGPASS certified on-line safety and training program, covering all employer / employee needs and regulatory requirements. We are extremely proud of our safety record and the material and trainings sessions our employees receive.

The ISNetwork Team has always been knowledgeable and helpful. We can depend on the Customer Service Team to help us meet our Owner Client requirements with prompt and informative service. I would like to thank the ISNetwork Customer Service team for their dedication and willingness to assist our needs, consider our suggestions, and address our concerns.

ISNetwork has increased Newsco's standard of excellence. I am a believer that Contractors and Owner Clients will find many unexpected benefits with ISNetwork, and will gain much appreciation for the ISNetwork Team and system. In addition to Training Manager (soon to be implemented), our company has found several other benefits that are included in our ISNetwork subscription. As a result of ISN's streamlined process, we are able to fill out just one online questionnaire, as well as submit our safety program and training documentation into one central location, in order to comply with all the Owner Client's requirements. This will save our company countless hours of inputting our company's information.

ISNetwork truly makes complying with the requirements of our Owner Clients and tracking our training information much easier. If I can answer any of your questions regarding ISNetwork, please feel free to contact me.

Sincerely,
