To Whom It May Concern:

Earlier this year RPS MetOcean Pty Ltd chose to invest in a contractor subscription with ISNetworld. In just six months, we have already seen a good return on this investment. The resources and feedback provided through the RAVS safety program audit, just one piece of our ISNetworld subscription, has made our subscription fee worthwhile.

Below is a list of a few of the ISNetworld attributes that we feel justify our subscription cost:

1. **Resources.** Easily accessible, clickable references to Australia OSH legislation through the RAVS process
2. **Feedback.** Guidance from Health and Safety Professionals who identify shortcomings in our safety programs
3. **Support.** Unlimited assistance by the courteous, professional, helpful, and attentive ISNetworld Customer Service Team
4. **Repository.** Information is stored online and easily accessible to all subscribing Owner Clients

As ISNetworld expands throughout Australia and more clients join the system, we expect the return on our investment to increase. It is our hope that eventually all of our clients will eliminate individual pre-qualification forms and choose to utilise the ISNetworld database.

Sincerely,

Richard Lailey
