To Whom It May Concern:

ScandriLL Inc. joined ISNetworld in 2004. We are no longer required to maintain an ISNetworld subscription by our Owner Clients, but we have chosen to keep our subscription due to ISNetworld's Training Manager tool and their outstanding customer service.

We use ISNetworld's Training Manager to manage all of our 20 company's location in-house training records. We have customized Training Manager to meet our company's specific needs. ISNetworld's data feed makes our in-house training record keeping nearly effortless. The data feed that we have in place with ISNetworld accommodates the high turnover rate that is common in our industry. We update our employee information in our company's payroll system, and it is fed automatically into our ISNetworld account. Our Rig Managers are then able to view their employees' training information through Training Manager and identify the training deficiencies for each employee.

ISNetworld's Customer Service Team complements their Training Manager functionality. The Customer Service Team continues to exceed my expectations. Any time I need assistance, they handle my requests in a professional, timely manner. I would recommend ISNetworld to any contractor who is seeking a database to manage their in-house training records.

Sincerely,

Paul Mosvold
