To whom it may concern,

Shannon Civil has 10 years of experience in the Civil Construction Industry and has built a strong reputation in the industry over the years. By becoming a member of ISNetwork it has opened new doors for us.

In September 2009, Shannon Civil joined ISNetwork to meet the requirements of one of our major Owner Clients, Caltex, Kurnell. Since then we added Caltex Lytton to our Client list and look forward to having many more clients in the future as ISNetwork expands.

ISNetwork constantly improves the tools and involves the users to assist them in making this program user friendly on all levels. The customer service team always responds to all our questions promptly and helps us in a timely manner.

Benefits form being a member of ISNetwork:

- Dashboard

The dashboard is displayed in a very professional format with all the key information for our clients to view at anytime.

- RAVS (Review and Verification Services)

This tool has helped us in ensuring our Safety programs are according to the client's requirements and up to date with the industry Standards.

- Document Accessibility

All our information is stored securely online and easy accessible for reviewing.

- Training Manager & Equipment Tracker

These are excellent tools for tracking our employees training records and maintenance of our Plant, Equipment and Vehicles. With these tools we can get quick reports for training updates and movement of our plant and equipment.

I would strongly recommend ISNetwork for their professionalism and excellent service to any size and type business.

Sincerely

Russell Bayley  
Managing Director
