

August 25, 2008

To whom it may concern:

TIMEC has been a subscriber with ISNetworld since 2002. As ISNetworld has expanded its client base and product offerings, TIMEC has grown as well. We currently manage 19,000 employee records in the ISNetworld system. The capability to store an unlimited amount of information in ISNetworld is incredibly valuable. Nine of our Owner Clients are viewing our information in ISNetworld, allowing TIMEC to efficiently provide requested information with the user-friendly, convenient ISNetworld system.

ISNetworld stands out from all other contractor safety management systems by providing value-added benefits to all contractors. ISNetworld is used to meet Owner Client requirements, plus there are additional tools to improve HSE record keeping and employee management. TIMEC manages 950 HSE courses within Training Manager. We work closely with the ISNetworld Customer Service Team, and their service is always prompt, friendly and knowledgeable. The recording and reporting capability of Training Manager is frequently enhanced and is a vital tool for my job functions and responsibility at TIMEC. We view ISNetworld as our one-stop-shop for employee personnel information, training records, and qualification data.

ISNetworld is a valuable system for contractors and Owner Clients, and I have no doubt that the value will continue to grow with future innovations and functionality. We have felt that our feedback is always welcomed, and our suggestions are often implemented by the ISNetworld Team. They truly care to help build tools to help meet our company's needs. I would be happy to discuss my ISNetworld experience, and I can be reached at (310) 223-6062.

Sincerely,

Donna Thomas
