ISNetworld

To whom it may concern,

Elmwood Tank & Piping Corp. is a mechanical contractor that specializes in servicing the mechanical and piping needs for major oil companies in their oil terminals. Elmwood is equipped to handle the following services throughout the Eastern United States:

- New Piping Installations
- Piping Modification
- Certified Pipe Welders in accordance with ASME Sect IX
- Tank Modifications and Repairs per API Standards
- Tank and Product Line Hot Tapping
- Bottom Lading System Installations
- Foam and Fire Protection Systems
- Tank and Oil/Water Separator Cleaning
- Vapor Recovery System Installation
- Tank Removal and Site Remediation

We are required to report to multiple agencies to fulfill the very stringent requirements of these customers. ISNetworld is by far the most advanced and thorough of all the agencies.

ISNetworld's requirements have encouraged us to improve and update the Elmwood Tank & Piping safety program and safety manual to become universally accepted by all of our customers.

ISNetworld's notifications help us to continually keep our safety procedures and trainings up to date. The ISN staff has been very helpful in guiding us through the implementation of these programs and helping us to maintain an "A" grade with all of our customers

We would encourage all contractors interested in working safer to become a member of ISNetworld. Thanks ISN!

Very Truly Yours,

David A. Nowak
President
Elmwood Tank & Piping Corp.
