ISN Receives Compliance Letter for 21 CFR Part 11 *ISNetworld Security Features Exceed Industry Standards*

DALLAS, Texas (February 4, 2010)— In its continued effort to further enhance ISNetworld’s product features and underlying processes, ISN announced today that it has achieved compliance with the Food and Drug Administration (FDA) regulation 21 CFR Part 11; Electronic Records and Signatures. ISN received a compliance letter and reached compliance in the following areas: Standard Operating Procedures (SOP) and Product Features. This regulation relates to GxP data (Good – Laboratory, Clinical, Manufacturing – Data). Part 11 defines the criteria under which electronic records and electronic signatures are considered to be trustworthy, reliable and equivalent to paper records.

“Working with clients in the Pharmaceutical Industry has expanded our reach of ISNetworld to other capital-intensive organizations,” said Joseph Eastin, President of ISN. “We are proud that ISNetworld has attained compliance with Part 11 to further grow our services with our clients and participate in other Pharmaceutical industry initiatives.”

The audit was conducted by David Nettleton, FDA Compliance Specialist. “ISN has clients that are regulated by the FDA and therefore has voluntarily initiated a 21 CFR Part 11 compliance initiative,” wrote Mr. Nettleton. “They have a sound ongoing compliance initiative and are continuously improving their overall level of compliance.”

ISN Corporate Vice President, Saks Ishrat added, “We have always strived for excellence in the product security of ISNetworld. To receive confirmation that our product security reaches compliance and in some areas exceeds industry standards, our clients can be assured their experience in using ISNetworld is safe and secure.”

About ISNetworld

ISNetworld provides an online vendor management database designed to meet internal and governmental record keeping and compliance requirements. ISN collects health and safety, procurement, quality and regulatory information for more than 23,000 vendors and 135 Owner Clients. Through its Review and Verification Services (RAVS), ISN’s subject matter experts review and verify vendors’ self-reported information, incorporating a level of due diligence to the process. Vendors also use the system to manage internal training and record keeping requirements. For more information, visit www.isnetworld.com.
