ArcelorMittal Selects ISNetworld for Contractor Management

Dallas, Texas, March 13, 2009 - ISNetworld announced today that ArcelorMittal has chosen ISNetworld as its primary tool for improving their contractor management processes.

ArcelorMittal is one of the world's leading steel companies with production facilities and employees in over 60 countries. With a wide spectrum of steel products, ArcelorMittal is able to provide to the global markets of the automotive, construction, household appliances and packaging industries. ArcelorMittal makes safety a high priority and is on a mission to become the world's safest steel and mining company. The company allocated over \$200 million in 2007 to improve safety measures in their facilities around the world and continues to emphasize the importance of safety within the workplace and responsibility to the environment.

Vice President of ISNetworld, Brian Callahan, stated, "ArcelorMittal has shown its dedication to continually develop valuable steel products and solutions while prioritizing safety in the workplace and decreasing the environmental impacts of their facilities. ISNetworld is looking forward to supporting ArcelorMittal's commitment to safety and the environment by providing assistance with their contractor management."

Brandi Surine, Manager of Manufacturing, added, "As we expand our presence in the steel industry, we are excited to welcome ArcelorMittal on board as our newest Owner Client. We look forward to a successful implementation with both ArcelorMittal and their contractors."

About ISNetworld

ISNetworld provides an online Contractor management database designed to meet internal and governmental health, safety, and environmental requirements. ISNetworld Review and Verification Services (RAVS) validate contractor information. ISNetworld has standardized health and safety communication and provides a method for subscribers to house documents, measure, compare and benchmark health and safety statistics, and provides a method of evaluation and communication between companies and their contractors. Contractors also use the system to manage training and record keeping requirements. For more information, visit www.isnetworld.com.
