El Paso Pipeline Selects ISNetworld for Contractor Management

Dallas, Texas, March 16, 2009 - ISNetworld announced today that the pipeline division of El Paso Corporation has selected ISNetworld as its primary tool for contractor management.

As one of the nation's largest natural gas pipeline systems, El Paso owns 42,000 miles of interstate pipelines, connecting North America's producing basins to key consuming markets. The cross-country pipeline system runs in the Western, Southern and Eastern regions of the U.S., transporting more than 25% of daily natural gas consumption. El Paso recognizes the importance of safety for their employees, contractors, clients and the public, as well as protecting the environment; they have shown this commitment by establishing a Health, Safety and Environmental Committee which ensures the company's operations maintain high performance in all health, safety, and environmental aspects.

President of ISNetworld, Joseph Eastin, stated, "With El Paso's dedication to safety, reliability, and efficiency, and as the nation's largest natural gas pipeline system, we are excited to have El Paso join ISNetworld as an Owner Client."

Lindsey Chase, Team Lead of ISNetworld's Midstream Team, added, "ISNetworld was pleased to participate during El Paso's 2009 Contractor EHS Forum to implement the recently established relationship."

About ISNetworld

ISNetworld provides an online Contractor management database designed to meet internal and governmental health, safety, and environmental requirements. ISNetworld Review and Verification Services (RAVS) validate contractor information. ISNetworld has standardized health and safety communication and provides a method for subscribers to house documents, measure, compare and benchmark health and safety statistics, and provides a method of evaluation and communication between companies and their contractors. Contractors also use the system to manage training and record keeping requirements. For more information, visit www.isnetworld.com.
