### **ISNetworld Expands its RAVS Offerings**

**Dallas, TX, November 18, 2008** – ISNetworld announced today that it has continued to expand the scope of its Review and Verification Services (RAVS) offerings to its global clients. Since the launch of RAVS in the first quarter of 2006, ISNetworld has added review and verification of certificates of insurance (I-RAVS), provincial Workers Compensation Board rates for Canadian clients, and supplier diversity status certifications to its offerings. During this period, ISNetworld has completed a desktop review of more than 5,500 contractors' written health and safety programs in the US and Canada. In addition, over 25,000 OSHA log and EMR letter verifications and more than 27,000 certificates of insurance have been reviewed for compliance through RAVS.

Joseph Eastin, President of ISNetworld, said, "In an era where the outsourcing of construction and maintenance work to third parties has become the norm in the industry, we have seen an increasing number of Owner Clients relying on ISNetworld's review and verification services as part of their due diligence process. The fact that more than 75% of our Owner Clients today utilize RAVS underscores the need for an efficient, standardized and economical solution for verifying contractor information."

Dag Yemenu, Director of RAVS, added, "As we further expand our service offerings, our ultimate goal will continue to focus on driving improvement in safety and compliance. There are clear indications that RAVS has already had a measurable impact on these goals. For instance, some of our Owner Clients have seen as much as a 100% increase in their contractors' insurance requirement compliance within a nine month period."

#### **About ISNetworld**

ISNetworld provides an online contractor/supplier management database designed to meet internal and governmental health, safety, and environmental requirements. ISNetworld Review and Verification Services (RAVS) validate contractor/supplier information. ISNetworld communicates health and safety standards and provides a method for subscribers to house documents, measure, compare and benchmark health and safety statistics, and provides a method of evaluation and communication between companies and their contractors. Contractor/suppliers also use the system to manage training and record keeping requirements. For more information, visit [www.isnetworld.com](http://www.isnetworld.com).
