ISNetworld Opens Operations in Australia

DALLAS (June 23, 2009) – ISNetworld announced today the opening of the company’s first Australian office which is located in Sydney. ISNetworld has opened an Australian office in order to accommodate the company’s rapid growth and expansion in the Australian marketplace. ISNetworld entered the Australian marketplace in December 2008 when Chevron Australia selected the company to be its primary tool for enhancing their contractor management process. Kim Cravens, has been chosen as Senior Team Lead, and is heading the Australian operations and efforts. There is an account management team and a support team in place who report to Ms. Cravens.

“Our growth and momentum during the past six months has made it very clear that we need a permanent presence and team in place to support our existing clients as well as pursue expansion opportunities in Australia,” said Joseph Eastin, President. “Opening an office in Sydney is proof that our global footprint is expanding. ISNetworld’s caliber of service combined with our tools that improve both industry safety and compliance are needed worldwide.”

According to Brian Callahan, Vice President, opening an office in Australia will allow the ISNetworld team to continue to provide customers with the high level of service they have provided for years. “Beginning July 1, our Australia team will set up face-to-face help desk sessions for contractors throughout Australia,” said Callahan. “ISNetworld’s level of personal attention, combined with our online tools, will assist contractors and Owner Clients across the country to enhance both their health and safety management systems as well as their pre-qualification process.”

About ISNetworld

With more than 18,500 subscribing contractor/suppliers and 130 Owner Clients, ISNetworld provides an online contractor/supplier management database designed to meet internal and governmental health, safety, and environmental requirements. ISNetworld Review and Verification Services (RAVS) enable the self-reported contractor/supplier information to be validated. ISNetworld communicates health and safety standards, and provides a method for subscribers to house documents, measure, compare, and benchmark health and safety statistics, and provides a method of evaluation and communication between companies and their contractors. Contractor/Suppliers also use the system to manage training and recording keeping requirements. For more information, visit www.isnetworld.com.
