### **ISNetworld Selected by Covanta Energy for Contractor Management**

**Dallas, Texas, July 30, 2008** – ISN Software Corporation (ISN) announced today that Covanta Energy has selected ISN and ISNetworld to enhance Covanta’s contractor selection processes by instituting a consistent electronic contractor performance qualification process. Covanta will utilize a Standardized Contractor Questionnaire (SCQ-V) and the Review and Verification Services (RAVS) process to qualify its contractors through the ISNetworld system.

Covanta is the first Energy-from-Waste company to join ISNetworld. Its facilities convert more than 15 million tons of municipal solid waste into clean, renewable energy for numerous communities, both here and abroad. Covanta facilities have a widely recognized reputation for reliability, safety, efficiency, and environmental responsibility.

“The electronic standardization of our contractor qualification process using the expert services of ISNetworld allows us to automate the manual process we’ve had in place for close to 20 years. This electronic standardization also allows Covanta to promote contractor safety performance efficiently through its participation in the United States Occupational Safety and Health Administration Voluntary Participation Program (VPP). Covanta has currently received the VPP “STAR” recognition at 24 of its operating facilities, with others completing the qualification process”, reported Beth Hurley, Vice President of the Covanta Energy Corporate Safety and Health Program.

Joseph Eastin, President of ISN, stated, “We are excited to work with this innovative renewable energy company. Covanta’s selection of our products illustrates the scale and applicability of our contractor/supplier management database products across different industry classifications.”

#### **About ISNetworld**

ISNetworld provides an online contractor/supplier management database designed to meet internal and governmental health, safety, and environmental requirements. ISNetworld Review and Verification Services (RAVS) validate contractor/supplier information. ISNetworld has standardized health and safety communication and provides a method for subscribers to house documents, measure, compare and benchmark health and safety statistics, and provides a method of evaluation and communication between companies and their contractors and suppliers. Contractors and suppliers also use the system to manage training and record keeping requirements. For more information, visit [www.isnetworld.com](http://www.isnetworld.com).
