ISNetworld Speaks at NPRA 2008 National Safety Conference

Dallas, Texas, May 7, 2008 ISNetworld Director of RAVS, Dag Yemenu, and Senior Account Manager, Kim Cravens presented to industry representatives at the 2008 National Petrochemical and Refiners Association 2008 National Safety Conference. The conference features safety, security and workforce development challenges in the industry. This is the fourth conference in the last six months at which ISNetworld has participated in sharing contractor management best practices. Other conferences include the Industrial Mining Association Meeting, the Sarnia-Lambton Industrial Educational Co-operative, and the American Petroleum Institute (API) Safety Conference.

Dag Yemenu, Director of RAVS, spoke at the conference and noted, “This was a valuable opportunity for sharing contractor management best practices and benchmarking trends we have compiled over the years with NPRA members. Industry initiatives are becoming mature enough to gather substantive, quantifiable data that shows safety initiatives like ISNetworld are having an impact in the work place.”

Joseph Eastin, President of ISN, commented, “We are honored to participate in these conferences. Not only does it offer an opportunity for us to discuss industry initiatives with our customers, but also affords an opportunity to give back by providing valuable information culminated within ISNetworld.”

About ISNetworld

ISNetworld provides an online contractor/supplier management database designed to meet internal and governmental health, safety, and environmental requirements. ISNetworld Review and Verification Services (RAVS) validate contractor/supplier information. ISNetworld has standardized health and safety communication and provides a method for subscribers to house documents, measure, compare and benchmark health and safety statistics, and provides a method of evaluation and communication between companies and their contractors. Contractor/suppliers also use the system to manage training and record keeping requirements.
