The Mosaic Company Selects ISNetworld for Contractor Management

DALLAS, Texas (June 9, 2009) – ISNetworld announced today that The Mosaic Company (Mosaic) has chosen ISNetworld as its primary tool to enhance their contractor management processes.

As one of the world's major makers of phosphate and potash, Mosaic produces crop nutrition and livestock feed ingredients through mining and processing operations. Both phosphate and potash are necessary ingredients in providing nutrition to the development of healthy crops. As the world continues to grow in population and prosperity, the demand for nutritious crops increases while the amount of arable land diminishes. By mining the resources required for healthy crop development, Mosaic is able to assist with the world's problematic increasing food demand by producing crop nutrients, livestock feed and industrial products and distributing these vital products to a global market. The company operates 16 phosphate rock mines and plants, five potash production facilities, and distribution facilities in 10 countries, enabling Mosaic to serve customers in over 30 countries.

Adrienne Turner, ISNetworld's Director of Business Development for Canada, stated, "Mosaic's presence in North America overlaps in several areas with existing ISNetworld Owner Clients, and many of Mosaic's contractors are already ISNetworld subscribers. We look forward to serving additional contractors with the best customer service team in the industry."

Senior Team Lead for ISNetworld's Mining Team, Bonney Hodges, added, "We are excited to welcome Mosaic as the newest ISNetworld Owner Client member. We look forward to working with Mosaic as they continue their dedication to maintain a safe working environment for their employees and contractors."

About ISNetworld

ISNetworld is a service company that provides an online contractor/supplier management database designed to meet internal and governmental health, safety, and environmental requirements. ISNetworld Review and Verification Services (RAVS) validate contractor/supplier information. ISNetworld communicates health and safety standards and provides a method for subscribers to house documents, measure, compare, and benchmark health and safety statistics, and provides a method of evaluation and communication between companies and their contractors. Contractor/Suppliers also use the system to manage training and recording keeping requirements. For more information, visit www.isnetworld.com.
