### **Newmont Mining Services Selects ISNetwork for Contractor Management** *ISN Expands with an Australian Mining Owner Client*

SYDNEY, Australia (1 November 2010) – ISNetwork is pleased to announce that Newmont Mining Services has selected ISNetwork as its primary tool for contractor management.

Newmont is the seventh Owner Client to adopt ISNetwork in Australia, and ISN looks forward to expanding into the mining marketplace.

Newmont's Asia Pacific operations include three Western Australian mines, Boddington Gold, in the southeast of the State, the Jundee Operations, near Wiluna in central WA, and a joint venture partnership in the Kalgoorlie Super Pit. Newmont also owns and operates the Tanami Operations in the Northern Territory. In New Zealand, Newmont owns Waihi Gold, on the North Island. It also has an interest in the Batu Hijau Copper Gold mine in West Sumbawa, Indonesia.

Senior Vice President of Newmont's Asia Pacific operations, Tim Netscher, said the move to ISNetwork was part of the company's ongoing commitment to the safety of its workforce, local communities and the environment.

"By centralising information about the procedures, policies, standards and qualifications of our suppliers we are able to more efficiently assess, track and monitor the suitability of each company for different types of work. It will also alert both the company and our Supply Chain Management team if a required permit, license, insurance or other document is due for renewal."

"We look forward to contributing to working with Newmont and building relationships with mining contractors across New Zealand, Northern Territory and Western Australia," said ISN Senior Vice-President Brian Callahan. "We see the mining industry as an expanding market for our Australasian operations."

#### **About ISN**

ISN provides an online contractor management database, ISNetwork, which is designed to meet internal and governmental record keeping and compliance requirements. ISN collects health and safety, procurement, quality and regulatory information for more than 28,000 contractors and 170 Owner Clients. Through its Review and Verification Services (RAVS), ISN's subject matter experts review and verify contractors' self-reported information, incorporating a level of due diligence to the process. Contractors also use the system to manage internal training and record keeping requirements. For more information, visit [www.isnetwork.com.au](http://www.isnetwork.com.au).
