BP Offshore Selects ISNetwork and SCQ-V

Dallas, TX, March 28, 2003 – ISN Software Corporation (ISN) announced today that BP Offshore has selected ISNetwork and the SCQ-V (Verified Standardized Contractor Questionnaire) as its online solution to automating an important element of contractor information management.

Joe Eastin, Executive Vice President of ISN, said, “Denise Campbell of BP Offshore worked closely with ISN in 2002 to make the SCQ-V fit their requirements. Among the elements they wanted were the direct incorporation of third party verified data and the ability for various BP Offshore departments to customize their view of the SCQ-V. In addition, they wanted the SCQ-V to gather and summarize information for contractor organizations with multiple divisions.”

Mr. Eastin continued, “We are proud to count BP Offshore among our growing base of industry operators that depend upon ISN for contractor information management. Our collaboration with BP Offshore is a terrific example of how we work with our customers. We welcome BP Offshore and its contractors to ISNetwork.”

For more information regarding this and other BP Offshore information, go to <http://gomcontractors.bp.com/>.

ISN Software Corporation, through its flagship ISNetwork product, automates the relationship between contractors and their owner/operator customers in America’s most capital-intensive industrial sectors. ISNetwork utilizes third party data wherever possible to create an added level of compliance record management and reporting integrity. For more information, visit www.isnetwork.com.
