ChevronTexaco E&P Co. Gulf of Mexico Business Units Adopts SCQ-V

Dallas, TX, July 17, 2003 – ISN Software Corporation (ISN) announced today that ChevronTexaco E&P Co. Gulf of Mexico Business Units has selected the SCQ-V (Verified Standardized Contractor Questionnaire) as its online solution to automating an important element of contractor information management.

Joe Eastin, Executive Vice President of ISN, said, “Cari Pope and other ChevronTexaco leaders carefully evaluated their options and decided that the SCQ-V best fits their requirements for the future. Among the elements they wanted were the direct incorporation of third party verified data and the ability for various ChevronTexaco departments to customize their view of the SCQ-V. In addition, they wanted the SCQ-V to gather and summarize information for contractor organizations with multiple divisions.”

Mr. Eastin continued, “ChevronTexaco had previously adopted ISNetworld for DOT Operator Qualification record keeping. The move to the ISNetworld SCQ-V makes it just that much easier for ChevronTexaco and its contractors to manage compliance data management and reporting needs in an efficient, cost effective manner.”

For more information regarding this and other ChevronTexaco information, go to <http://www.chevrontexaco.com/contractorgom/>.

ISN Software Corporation, through its flagship ISNetworld product, automates the relationship between contractors and their owner/operator customers in America’s most capital-intensive industrial sectors. ISNetworld utilizes third party data wherever possible to create an added level of compliance record management and reporting integrity. For more information, visit www.isnetworld.com.
