ISNetworld ID Cards Now Include Employee Photos

Dallas, TX, April 2, 2004 – ISN Software Corporation (ISN) announced today that it has started issuing ISNetworld ID cards that include employee photos and other enhancements. Previously, ISNetworld ID cards included only an employee's name and ISNetworld ID number.

Julie Polk, Senior National Account Manager of ISN, said, "The ISNetworld ID card is an important element in assisting operators and contractors with improving employee compliance record management and reporting. From the beginning, we have allowed contractors to upload employee photos into ISNetworld to assist with online verification of employee identity. Until this year, the photos were not included on the ISNetworld ID card. Operators and contractors alike have asked us if we could enhance the card by including employee photos and certain other security enhancement features. In conjunction with Sandia Imaging, the leader in photo ID card technology, we have created and rolled out a new ISNetworld ID card that meets and exceeds our customers' requirements."

Ms. Polk continued, "We have about 100,000 employee photos in ISNetworld. This number is increasing rapidly as more operators require ISNetworld photo ID cards. The enhanced photo ISNetworld ID card is provided free of charge to ISNetworld contractor/employer subscribers. In addition, the new ISNetworld ID card gives us the opportunity to provide additional security and other features in the future. Stay tuned for further announcements."

ISN Software Corporation, through its flagship ISNetworld product, automates the relationship between contractors and their owner/operator customers in America's most capital-intensive industrial sectors. ISNetworld utilizes third party data wherever possible to create an added level of compliance record management and reporting integrity. For more information, visit www.isnetworld.com.
