ISNetworld Passes 10,000 Customer Mark

Dallas, TX, October 1, 2007 – ISN Software Corporation (ISN) announced today that ISNetworld now has over 10,000 contractor subscribers. The names and subscription start dates of all 10,000 subscribers may be viewed by going to www.isnetworld.com.

Bill Addy, Chairman and CEO of ISN, said, “ISNetworld became operational in 2001 and we finished 2001 with fewer than 50 customers. At that time, we set 10,000 subscribers as an important and achievable goal. Today’s announcement is a terrific endorsement of our product, our service and our company”.

Joseph Eastin, President of ISN, said, “We want to thank the Owner Clients and contractor subscribers that have worked with us over the last seven years to create ISNetworld. In addition, we wish to thank our employees who have worked tirelessly to provide the best experience available to our customers. As our business expands to new geographies and new industries, we expect to achieve even greater milestones in the future.”

ISNetworld automates the relationship between contractors and their Owner Clients in North America’s most capital-intensive industrial sectors. ISNetworld utilizes third party data wherever possible to create an added level of compliance record management and reporting integrity. For more information, visit www.isnetworld.com.
