United States Steel Corporation Selects ISNetworld for Contractor Management

Dallas, TX, August 20, 2008 – ISNetworld (ISN) announced today United States Steel Corporation (U.S. Steel) has selected ISNetworld as the primary tool for contractor management.

U.S. Steel is an integrated steel producer with major production operations in the United States, Canada and Central Europe. The company manufactures a wide range of value-added steel sheet and tubular products for the automotive, appliance, container, industrial machinery, construction, and oil and gas industries.

Brian Callahan, Vice President, stated, “U.S. Steel is dedicated to maintaining high safety and industrial hygiene standards with their contractors and we are confident their implementation and use of ISNetworld will only enhance these efforts. We are excited to continue to reach out to the steel industry.”

ISNetworld President, Joseph Eastin, added, “As we continue to help Owner Clients and contractor companies mitigate risk, we look forward to our relationship with U.S. Steel and many others that touch the manufacturing industry.”

About ISNetworld

ISNetworld provides an online contractor/supplier management database designed to meet internal and governmental health, safety, and environmental requirements. ISNetworld Review and Verification Services (RAVS) validate contractor/supplier information. ISNetworld communicates health and safety standards and provides a method for subscribers to house documents, measure, compare and benchmark health and safety statistics, and provides a method of evaluation and communication between companies and their contractors. Contractor/suppliers also use the system to manage training and record keeping requirements. For more information, visit www.isnetworld.com.
